Abstract (en)
Integrated Peltier element (22) forms heating and/or cooling surfaces, or again heating and/or cooling compartments (14,16), these being flat and extensive with hot and cold sides of the element (22) under switch control. The superposed compartments (14,16) are divided by a partition (20) whose integrated Peltier element is used to heat one and cool the other compartment. The upper compartment can be closed by a fold-down lid (18). Peltier elements are so integrated into trolley side or rear walls that one part reaches into the trolley and the other part of the element lies on the side or rear wall surface.

Abstract (de)
Die Erfindung betrifft einen fahrbaren Küchenwagen, in welchem mittels eines unmittelbar innerhalb des Küchenwagens integrierten Peltierelementes Kühl- und/oder Wärmeflächen bzw. Kühl- und/oder Wärmefächer gebildet werden. <IMAGE>
