Abstract (en)
[origin: DE10124571A1] The screw driver housing (11) contains drive (32), reduction gear (38), spindle (40), and offset head (20). The reduction gear has a reaction part to accommodate a reaction momentum relative to the spindle. The part is connected non-turnable to the offset head housing (19), and coupled to the drive via an adjusting unit (58). A torque limitation coupling (50) has a first part fastened non-turnable to the offset head housing, and a second part similarly fastened to the reaction part of the reduction gear.
