Abstract (en)
[origin: EP1260333A2] The blade packet for a chopping machine, to produce wood chips, has a blade carrier (4.3) with a clamping plate (4.1) to take a blade (4.2) clamped between them. The clamping pressure is applied by a cone nut (4.4) or a cone screw bolt. A screw set pin (4.5) gives the correct positioning for the carrier and the clamping plate. The blade is secured to the clamping plate by setting screws (4.6).
