Abstract (en)

[origin: EP1260658A1] The lock for a security door has shield plates (21,22) on each side surface of the lock. The shield plates have openings for a key and support sliding cover plates (33,34) for the openings. The lock has a sensor (44) for fixing the position of the slide covers. The sensor is connected to a central control. The sensor can be formed by contacts opened and closed by movement of the covers.
