Abstract (en)

[origin: EP1260662A2] The coupling for drive shafts (6,7) has two longitudinal movable drive shafts within a receiving groove or a recess (30) of a door or window. Form lock formations (10,13) can be connected by the shafts. At least one drive shaft has a spacer (15) which supports the shaft in the connecting direction of the form locking formations against the base (11) of the groove. The spacer is connected to the respective shaft and movable with it.
