Abstract (en)

[origin: EP1260665A2] The top end of the wire (7) is connected to loading springs and the bottom end passes through a hole in a closure cap (10). A spring (9) presses against the inside of this cap. It pushes down on a fitting (8) accommodating a thickened portion on the end of the wire. The lower end of the fitting may bear on the end of the sliding bolt (12) there is a lever (13) extending downward from a pivot (14) near the bolt.
