Abstract (en)

[origin: WO0164750A2] A method of modulating angiogenesis in a vertebrate subject, the method comprising administering to the vertebrate subject an ECRT/DEP-1 activity-modulating amount of a composition, whereby an ECRT/DEP-1 within the vertebrate subject is contacted by the composition ; and modulating angiogenesis through the contacting of the ECRT/DEP-1 with the composition. Optionally, the composition includes a monoclonal antibody which preferentially binds ECRT/DEP-1. Methods for screening for modulators of ECRT/DEP-1 are also disclosed.
