Abstract (en)
[origin: EP1262126A2] The spandrel region (9) of the corner part is bridged or covered by sliding or pulling out a seat cushion (4.3) from the seat (3) not containing the pull-out bed frame (6). This cushion is slid or pulled out in the direction of the adjacent width side (10) of the bed surface (11) of the pulled-out bed. The sofa (1) comprises two seats (2, 3) with at least two seat cushions (4.1-4.4), arranged at right angles to each other via an intermediate corner section (5). The first seat (2) contains an upholstered pull-out bed frame, which when pulled out combines with one of the cushions (4.3) in the second seat to form a bed surface.
