Abstract (en)

[origin: EP1262413A2] The re-closable pouring element made of a foil material, in particular, for plastics-covered cardboard containers accommodating liquids comprises a pouring lip (5) which is joined to the main body (4) by means of a section with at least two foil hinges (12, 13). The foil hinges (11, 12, 13) are always located at a distance from the pouring opening (3).
