Abstract (en)
The support cheek for a roller shutter reel shaft (7) is tiltably mounted on a support base (9). The support cheek has adjusters (10) for the position of the base (9) in the plane of the cheek in a direction in a direction parallel or perpendicular to the plane of deployment of the shutter. The cheek has a slot (13) extending in the displacement direction of the base and a stop to limit movement of the base along the cut out.
