Abstract (en)
[origin: EP1262730A2] Firework body (1) for placing on the ground comprises at least one receiving part (2) for at least one pyrotechnical unit (3-10), which is connected to a base plate corresponding approximately to the cross-section of the receiving part and provided on its edges with extension elements (11). Preferred Features: Several firework bodies are joined together with their sleeves forming the receiving parts to form a firework battery and are connected to the base plate. The extension elements are connected to the base plate so that they can fold up.
