Abstract (en)

[origin: DE10009439A1] According to the invention, the washing fastness of dyed fibers, especially of keratin fibers, is distinctly increased by using cationic protein hydrolysates.

[origin: DE10009439A1] Cationic protein hydrolyzates (I) are used as agents for improving the wash-fastness of dyed fibers. An independent claim is also included for a composition for improving the wash-fastness of dyed fibers, comprising a cationic protein hydrolyzate, a polymer and a 2-pyrrolidinone-5-carboxylic acid derivative.
