Abstract (en)
[origin: FR2805834A1] Installation comprises a fluid metering assembly (1) connected to a fluid supply (2) and outlet (3) pipes. Metering assembly (1) is mounted in an inspection window (4) below the frost line with the pipes in a trench connecting to the inspection window. The meter assembly can be removed with or without interrupting the fluid flow. Inlet and outlet pipes are connected to the meter assembly using flexible junction pipes (9, 10) supported by a meter plate (8). An Independent claim is made for a method for removing a meter assembly from a viewing window in which a cover is removed and the meter assembly lifted vertically by uncoiling of the flexible connection pipes.
