Abstract (en)

[origin: DE10010529A1] The pressure medium line (10) is joined to a connecting piece (15). An attachment (30) is fixed to housing (40) by means of at least one fastening (42), and has an opening for the connecting piece to go through. A locking element (20) is inserted into the opening. The connecting piece is inserted into the locking element, and has an insertable extension comprising at least one holder element (17) in the form of a cavity, bulge or groove. The connecting piece has at least one seal (16).
