Abstract (en)
 [origin: DE10013284A1] The identity of a data carrier and memory device is verified by additional measures in order to improve security of the system and information characterizing the safety or security element is stored in the memory device belonging to the data carrier, since the security or safety element varies considerably from data carrier to data carrier. The data carrier is specifically a euro-check-, a bank-, credit-, cash-UMTS-, a health-security and/or a telephone- card.
 [origin: DE10013284A1] The identity of a data carrier and memory device is verified by additional measures in order to improve security of the system and information characterizing the safety or security element is stored in the memory device belonging to the data carrier, since the security or safety element varies considerably from data carrier to data carrier. The data carrier is specifically a euro-check-, a bank-, credit-, cash-UMTS-, a health-security and/or a telephone- card.
