Abstract (en)
A dispenser (20) for dispensing abrasive paper from a roll can be held in a user's hand. The dispenser has a body (5) for receiving a roll of abrasive paper, and the body has an aperture (19) to allow a free end (10) of a roll of abrasive paper to pass out of the body (5). The aperture (19) is normally open and a user can close the aperture thereby to trap abrasive paper. The body (5) is spring-loaded so as to bias the aperture (19) towards its open position. A user can close the aperture by applying pressure to the body. A tearing edge 6 for tearing a desired length of abrasive paper from a roll is provided. The tearing edge (6) is preferably spaced from the aperture (19) so that after a piece of abrasive paper is torn from the roll the new free end of the roll protrudes from the dispenser. <IMAGE>
