Abstract (en)

Railway track machine (1) comprises a ballast clearing device (7) and a machine frame (5) moving along a track (3) on a rail chassis (4). At the rear end (17) of the machine two crawler chassis (18) arranged a distance apart in the transverse direction are connected to the machine frame. The height of the crawler chassis is adjusted by a drive (19). Preferred Features: The crawler chassis are arranged directly behind the rear rail chassis. A discharge part (21) of the clearing device is arranged between the crawler chassis and the rail chassis. The clearing device is an endless clearing chain (10) rotated by a drive (9) around the rear rail chassis. A track-lifting device (12) is provided in the region of the rear rail chassis.

Abstract (de)

Eine Gleisbaumaschine (1) mit einer Räumvorrichtung (7) zur Aufnahme von Bettungsmaterial (2) eines Gleises (3) weist einen über Schienenfahrwerke (4) gleisverfahrbaren Maschinenrahmen (5) auf. Am bezüglich der Arbeitsrichtung der Maschine (1) hinteren Ende (17) sind zwei in Maschinenquerrichtung voneinander distanzierte, durch Antriebe (19) höhenverstellbare Raupenfahrwerke (18) angeordnet. Diese sind mit dem Maschinenrahmen (5) verbunden. <IMAGE>
