Abstract (en)
[origin: EP1264936A2] The invention relates to a guide device (2) for helping drivers to guide their vehicles into parking spaces, and a car park that includes a plurality of the guide devices for delimiting the boundaries of parking spaces in which vehicles may be parked, thereby defining the layout of the car park. The guide device (2) includes a support member (10) that is constructed and arranged to stand on the ground, at least one arm that is supported by the support member and in use extends substantially horizontally from the support member, and a ground anchor (12) having a lower part for anchoring in the ground and an upper part to which the support member may be attached. <IMAGE>
