Abstract (en)

[origin: EP1265032A1] The gas turbine engine combustion chamber has an annular metal casing (12,14), a fuel injector assembly and a composite combustion chamber (24). There is a metallic distributor (42) forming an inlet stage with fixed vanes (44) for a high pressure turbine and attached by movable fixings (50). The combustion chamber is mounted floatingly in the casing and held in position with respect to the distributor by movable fixings (52,58,60).
