Abstract (en)

[origin: EP1265198A2] The arrangement has at least one stimulation device for stimulating luminescent light (16) in or on the document (10) under investigation and at least two detector units (1,2) for detecting at least some of the luminescent light emitted by the document. The detector units are arranged one behind the other in relation to the luminescent light emitted by the document. AN Independent claim is also included for the following: a method of investigating documents.
