Abstract (en)
[origin: WO0167858A1] Animal trap (10) comprises at least one base member (12) for contact with ground, at least one frame member (18) pivotally arranged with respect to at least one base member (12) and release mechanism (30) for holding, in use, at least one frame member (18) under tension above ground. Netting (54) attached to at least one frame member (18) so that when release mechanism (30) is tripped by animal (56) entering trap (10), at least one frame member (18) pulls netting (54) over animal (56) as at least one frame member (18) falls to ground when tension is released.
