Abstract (en)

[origin: WO0170074A1] The invention relates to seat and backrest assemblies for seating, in particular office chairs. Said assemblies comprise a seating platform, a seating platform support and a backrest support, whereby the seating platform (1) is connected in a displaceable manner in the vicinity of its front, knee-supporting edge (2) to the seating platform support (3) and in the vicinity of its rear edge (5) to the backrest support (6). The backrest support (6) is coupled to the seat platform support (3) so that it can be displaced. The inventive seat and backrest assemblies are characterized in that spring means (4) for cushioning the seat platform (1) and the backrest support (6) are located in the vicinity of the front, knee-supporting edge (2) of the seat platform (1), between said seat platform (1) and the seat platform support (3).
