Abstract (en)

[origin: WO0170583A1] The present invention relates to a foldable crate (1), comprising a substantially rectangular bottom part (2), a first set of mutually opposite side walls (3) connected hingedly to the bottom part, and a second set of mutually opposite side walls connected hingedly to the bottom part and the first set of side walls, wherein at least the first set of side walls comprises three parts (4, 5) connected hingedly to each other, and wherein the crate further comprises means for fixing the side walls in folded-out position.
