Abstract (en)  
[origin: WO0166907A1] A downhole cleaning tool, comprising, a body (2) or mandrill attachable to a work string or drill string, cleaning elements (9) suitable for cleaning a downhole surface such as the inside wall of well casing or liner or the like, radially extendible members (6) attached to said cleaning elements for operationally mounting said elements on the body, said members being adapted for moving the cleaning elements between a stowed position juxtaposed to the body or mandrill to permit transit of the tool downhole, and a deployed position to permit contact between the cleaning elements and a downhole surface to be cleaned, actuating means (12) provided on the body for moving the radially extendible members to deploy the cleaning elements, and biasing means (22) provided between the cleaning elements and the body for urging the cleaning elements towards said stowed position.
