Abstract (en)

[origin: WO0173314A1] The invention concerns a hydraulic shock absorber (1) comprising a shock absorber body (16) wherein is provided a compression chamber in which slides a piston (3) and its rod for compressing a damping fluid which it draws with drawing means. The invention is characterised in that it has at least two different operating modes corresponding to different drawing means (MLC, MLV) and it comprises adjusting means (MR) for shifting from one operating mode to the other.
