Abstract (en)

[origin: FR2825598A1] The microwave oven is supported on feet (30) which project through holes (34) in a separation plate (13) and is secured against overturning when the door is opened by a locking mechanism (50). The mechanism is shaped as a flat rod (52) which passes through an aperture in the rim (13a) of the separation plate and has the adjacent end folded to form a hook. The hook engages with the rear of the oven and the rod is tightened by a screw (55a) Independent claims are also included for the following: A kit of ready to build parts including a stabilising element for installing an oven in a recess. The use of the kit to install an oven
