Abstract (en)

[origin: EP1266827A1] High-performance sandbag filling system comprises a forced mixing system and at least two independent sandbag filling pipes. The system has a supporting frame, a mixing drum with mixing teeth rotating inside, and sandbag filling pipe discharge chutes. Preferred Features: Each sandbag filling pipe discharge chute can be operated independently of the other sliders. The mixing teeth must rotate in the same direction as that in which the sliders are opened.
