Abstract (en)
[origin: EP1267025A2] A casement fitment grips over an edge of the window frame (1). The casement (2) covers mounting parts (11,15), one of which, belonging to a corner mounting (3), is fixed to the window frame; the other mounting part, fixed to the casement, engages with the mounting part of the window-frame. A seal (8) seals the casement against the frame. The mounting parts protrude into a pocket (6) in the casement and are supported against each other. One mounting part has a fixed holder part (16) ad a coupling part (17) pre-assembled with the other mounting part.
