Abstract (en)

[origin: EP1267079A1] A compressor assembly (1) for motor vehicles is disclosed, comprising: a compressor (3); a silencer (5); optionally a cooling radiator (9); and a protection cover (7) that covers the other components, which are placed one above the other in a vertical arrangement, in order to find, starting from the ground level, first the compressor (3), then the silencer (5) and finally the cover (7), and thereby realising a compact unit with reduced encumbrance to be installed on a motor vehicle, particularly a truck. <IMAGE>
