Abstract (en)

[origin: WO0172196A2] The invention relates to an improved cleaning device for moving stairways or sidewalks that is characterized in that it comprises in addition to its cleaning head (7) an off-set support leg (13). The cleaning device is further provided with a gripper, guide, steering and/or control device (3) that comes to rest above the support (16) of the support leg (13), and/or the cleaning head can be swiveled by 180 DEG with respect to its operative position and/or the cleaning device is further provided with a strip-shaped broom device (41) that has the function of a sealing strip for a suction strip (23).

[origin: WO0172196A2] The invention relates to a cleaning device that is characterized by the following features: the cleaning device comprises a cleaning head (7) with a revolving broom system (7) with glide and/or roller means; the cleaning device, in addition to its cleaning head (7), comprises an off-set support leg (13); the cleaning device is further provided with a gripper, guide, steering and/or control device (3) that comes to rest above the support (16) of the support leg (13); and/or the cleaning head can be swiveled by 180 DEG with respect to its operative position and/or the cleaning device is further provided with a strip-shaped broom device (41) that has the function of a sealing strip for a suction strip (23).
