Abstract (en)
[origin: WO0174319A1] The present invention relates to agents for colouring keratinic fibres which contain at least one colorant intermediate product and at least one enzyme of the type of the oxidoreductases in a cosmetically acceptable carrier. Said enzyme is present as a homodimer in a solution under non-denaturing conditions. The inventive agents are characterised by the good colouring ability thereof and by the action thereof which is gentle to the hair.
