Abstract (en)

[origin: WO0176704A2] Interactive wagering systems and methods are provided for giving a user the ability to participate in lotteries using user equipment. An interactive wagering application may provide the user with a listing of lotteries in which the user may participate. The user may select to participate in any one or more of the lotteries. The interactive wagering application may give the user the ability to automatically participate in lotteries using default lottery numbers or randomly generated lottery numbers. The interactive wagering application may provide notifications to the user when a lottery drawing is about to begin.
