Abstract (en)
[origin: WO0176752A1] The invention concerns a pipette comprising a body (2), an arm (20) mobile relative to the body parallel to a longitudinal direction (10) of the pipette to eject a tip fixed to the body and a push button controlling (14) the movement of the arm. The pipette is arranged so that the push button (14) produces a sliding pressure on the arm (20) during the movement of the arm relative to the body.
