Abstract (en)

[origin: DE10110503A1] The painting error elimination process is applied to small errors in the painting of cars. The paint (12, 14, 16, 18) is removed to such a depth that the error point (20) is at least partly eliminated. The recess thus formed is repainted. The paint is removed in a region, the diameter of which is not more than 10 times the diameter of the error point.
