Abstract (en)
[origin: WO0164567A1] The present invention provides a cutting strip (102) which includes a flat, strip member (201) adapted to be attached to the edge of a carton. The member (201) having a first edge (202) having a plurality of teeth (204). The plurality of teeth (204) having a non-uniform tooth pattern (205) which comprises a first tooth pattern along a first section (209) of the edge and a second tooth pattern (207) along a second section (210) of the edge so that a sheet-tearing force can be applied to a sheet on either the first end or the second end of the member (201).
