Abstract (en)

[origin: WO0177006A1] The invention relates to a device for transporting a medium (10), comprising a conduit assembly (12) which allows several tanks (14) to be filled and/or drained and comprising fill-level gauges (16), located essentially in the interior of the tanks (14), for determining the position of at least one limiting surface (18) of the medium (10) in the tanks. The invention also relates to a method for transporting a medium (10) by means of a conduit assembly (12), whereby the fill level in several tanks (14) is measured by fill-level gauges (16).
