Abstract (en)
[origin: WO0172940A1] A fabric rebuild polymer comprising a cellulose or other beta -1,4 linked polysaccharide backbone with acetate groups pendant thereto, the average degree of substitution of acetate groups on the saccharide groups of the backbone being 0.55 - 0.70, with a molecular weight in the range 12,000 - 20,000 gives particularly effective fabric rebuild effect in a laundry treatment process at a pH in the range 9.5 - 11.0.
