Abstract (en)

[origin: WO0173178A1] The invention relates to a circular knitting machine for multicoloured plush. A plush sinker (113) is provided with at least two planes (90, 91) for kinking loop threads of different loop length. The knocking-over sinker (112) has a bill comprising at least two webs (96, 97) for restretching pile loops of different loop length. Plush knitted goods having plush loops of different heights and different colours can be produced by means of said circular knitting machine. Knitted goods being combined of epinglé and velour can thus be produced by shearing the longer plush loops.
