Abstract (en)

[origin: WO0173199A1] The invention relates to paper coating slips, containing a copolymer as binding agent, which may be obtained by radical polymerisation of ethylenic unsaturated compounds. The invention is characterised in that at least one of the ethylenic unsaturated compounds is a polymer, with at least one copolymerisable ethylenic unsaturated group, a number average molecular weight of 500 50000 g/mol and at least one carboxylic acid group (henceforth referred to as ethylenic unsaturated polymer).
