Abstract (en)
[origin: WO0175390A1] The invention concerns a dual operating pyrotechnic charge (1). The inventive charge comprises a nominal explosive charge (3) enclosed in a secondary detonating charge (5) encased in a fragment generator (7) contained in a protective casing (9), said pyrotechnic charge further comprising first initiating means (11, 13) and second initiating means (15), the first and second initiating means capable of being independently controlled by control means (17, 19), for selectively transmitting a pyrotechnic instruction respectively to the nominal explosive charge or the secondary explosive charge, detonation of the secondary explosive charge not priming the nominal explosive charge.
