Abstract (en)

[origin: WO0177964A2] The present invention provides systems and methods for determining projected effects of proposed wagers on parimutuel pools in interactive wagering systems. In order to assist a user in making a wager, the projected effects of a user's proposed wager on associated parimutuel pools are provided to the user. The projected effects that are provided include projected odds associated with the proposed wager, which are calculated based on both the user's proposed wager and associated parimutuel pool information.
