Abstract (en)

[origin: WO0173800A1] The invention relates to a method and a device for producing a tag, a chip card or an ID card, a transponder unit and the like, comprising an antenna or a coil for wireless transmission of information to remote receivers and/or for receiving information from remote transmitters. The shape of the antenna or coil is punched out of an electrically conducting flat foil which is subsequently joined to other layers including an electric chip module.
