Abstract (en)

[origin: EP1269879A1] Each bracelet end (10,20) has two or more short cylindrical mechanical contacts (12,14) with their axis in the plane of the watch case. The contacts fit into blind drillings in the watch case (15,17) at the 12 hr and 6 hr positions and the design allows for the installation (13,16) of a microcamera. The bracelet is secured by staples (18,28) which pass through holes in the watch case and contacts
