Abstract (en)  
[origin: EP1270153A1] Haircut scissors having a weight-reducing engraving pattern or a weight-reducing opening pattern are provided. Weight of scissors can be reduced under control by controlling the engraving or opening pattern. The engraving or opening pattern may be filled with a filler material such as a plastic material or a metal different from the scissors material. The engraving pattern and the opening pattern with or without a filler provide an additional attractiveness to the scissors. <IMAGE>
