Abstract (en)
[origin: DE19841942A1] The box consists of container (10) and pivoted lid (11), and e.g. a printed note/coupon (38) in the lid. The coupon has a projection facing a front wall (17) of the lid, and the wall has a corresponding projection. When the carton/box is opened, the projections act together to pull the coupon out of the container. The second projection is formed by an inner flap (39) of the lid, resp. by an upward facing edge (40) of that flap. The coupon may be anchored in the lid by adhesive.
