Abstract (en)
Support construction for silos (2), more particularly for one or more silos (2), which support construction (1) consists at least of upright-standing columns (3) and one or more struts (5), carried by the columns (3), for supporting the silo (2), silos (2), respectively, characterized in that, on one hand, the columns (3) consist of beams (4) of reinforced concrete which are provided with coupling means (9) for attaching the struts (5), whereas, on the other hand, the struts (5) consist of metal, more particularly steel. <IMAGE>
