Abstract (en)

[origin: EP1270469A1] The contact roller system for a slitter-rewinder has adjustable pressure rollers (4) which fit against the tape rollers during winding. These are arranged side-by-side on a parallel shafts (6) with a gap between which allows them to rotate freely. Their pressure is adjusted by levers (1) containing an adjustable drive (2) and which are mounted on a common shaft.
