Abstract (en)

[origin: EP1270473A2] The system for compensating for slanting feed of a paper web (2) through a corrugated cardboard making machine comprises digital cameras (40) which detect the positions of the edges of the web. The data from these is fed to a control unit (43) which operates a spindle motor (30) to adjust the position of the processing tools (11, 24, 35) on the web.
