Abstract (en)

[origin: FR2826033A1] The safety platform for formwork (2) with an adjustable radius of curvature comprises circulation means adapted to the radius of curvature. The circulation means consist of a plate (13) comprising end elements (14,15) connected to the formwork by an articulated device and to a central element (16) by a pivoting connection allowing the platform to pass from folded to unfolded positions relative to the formwork and follow the formwork radius of curvature.

Abstract (fr)

Passerelle de sécurité (1) comportant des moyens de circulation (13) qui sont agencés d'une part, pour passer d'une position pliée à une position dépliée perpendiculaire à la banche de coffrage (2) et d'autre part, pour s'adapter et suivre le rayon de courbure de la banche de coffrage (2).
