Abstract (en)  
[origin: EP1270861A2] Doorsill (10) for a door has at least one abutment element fixed on a sill part fixed to the doorsill. Preferred Features: The sill part is an extruded profile or cast part fixed to the doorsill outside the fixing region of the abutment element. The sill part is a cover part (12) covering a screw channel (13) in the doorsill in which screw heads of fixing screws screwed into the base (14) of the doorsill are arranged. The cover part covers a longitudinal section (15) of the screw channel which is covered by at least one further abutment element-free cover (16).
